

On 09/13/2017, I reviewed and analyzed the information obtained from the cellphone forensic examination of [REDACTED]. I reviewed material from [REDACTED]'s text messages and was able to gather the following:

Conversation with [REDACTED] talking about the party. [REDACTED] appears to be ok with having someone at the party who she potentially may have problems with. She states that if this individual doesn't have any problems with her and wants to come to the party then she can. The conversation is as follows-

There are several other conversations that [REDACTED] had on 09/09/2017 stating, in summary, that she did not know what happened to Kenneka. She further states how she was in the room the entire time and did not see Kenneka when she was in the hallway. She sent texts messages stating the following regarding this incident:

In all the text I reviewed from Irene, sent and received, it did not appear that she strayed from her accounts of what happened the night of the listed incident. She adamantly claims that she never left the hotel room when Kenneka did and did not know what happened to her when she went into the hallway. She describes in multiple texts that Kenneka was drunk and the most drunk she has seen her.

I also analyzed her pictures and videos and did not find anything helpful to the investigation of this incident.
